Big Data Centre Of Excellence								
<p>“Big Data Centre of Excellence” is the Research and Development centre of AKGEC. It is the first “Centre of Excellence” in AKTU, working in the field of BigData. It was established in 2013 and since 4 years it has been motivating and guiding the students into the world of Big Data. Big Data is the most trending technology of 21st century. It is the hottest market currently. Companies require Big Data Analysts to analyze the large amount of data being generated and gain insights from the data. Businesses are focusing more on agility and innovation, adopting BigData technologies help the companies achieve that in no time. The team aspires to develop skills in Big Data and gradually move from Machine Learning to Deep Learning and finally Artificial Intelligence.</p>

2	CSI	Initiative '17	THE INITIATIVE is the national level, inter college event organised by team CSI every year. This event is a hybrid of real-life tasks and a closed corridor presentation, and aims at bringing out the lost questioner from an Indian prodigy, who in many ways presents the answer himself. The main aim of organizing this event is to brainstorm the minds of young students about the burning issues in the country. Steps Involved in Initiative:- 1) Topic The topics were selected on the basis of the opinion given by the majority of the students and faculty . These Topics were the prevailing issues present in the society . Among the issues presented by the students , a polling was conducted and based on that five majority topics were selected . 2) Team Formation and Synopsis Submission Team of 2 or more students were allowed to participate and they submitted synopsis on one of the selected topics . Synopsis was the first criteria of selecting a team. 3)Presentation	#####	Ruchin Gupta and Luckness Kumar	Karan Batra Pranjali Sharma

3	CSI	Blockchain Technology '18	This time Team CSI presented a workshop on the most demanding technology BLOCKCHAIN. Blockchain is a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system. A blockchain is essentially a digital ledger of transactions that is duplicated and distributed across the entire network of computer systems on the blockchain. The blockchain is an undeniably ingenious invention. Is it the new internet? By allowing digital information to be distributed but not copied, blockchain technology created the backbone of a new type of internet. Bitcoin has been called "digital gold," and for a good reason. To date, the total value of the currency is close to \$112 billion US. And blockchains can make other types of digital value. Participating students learned about Blockchain, Cryptography, and many more related topics along with programming in Solidity language. It was a 4 day workshop.	-25th October-29th October, 2018	Ruchin Gupta and Lucknesh Kumar	Aditya Barnwal

1	Phoenix	Technical presentation	ECE departmental society has organised an event on 13 Nov 2021. This is a technical presentation event based on Visible light communication and Plastic Solar cells topic. Students of second and third year participated in this event and prepare a presentation on that. Each team has four members. The objective of presentation is to acknowledge students with emerging ideas in this fascinating and expanding world of engineering and technology. Thus, this event manifests the conglomeration of talent, intellect, innovative and competitive spirit of the students. This presentation also looks ahead to guide the students towards an appropriate path of creative thinking, planning, and team work.	13 Nov 2021	Mr. Dushyant Singh Chauhan	Shashwat Shukla Anushka Bajpai	Phoenix Team members	NA
